

TO WHOM IT MAY CONCERN,

Dear Sir/Madam,

I am proud to announce that **Joao Pedro Pires** was accepted to present scientific research entitled : «**Antimicrobial efficacy of locally delivered minocycline in decontaminating implants affected by peri-implantitis: a pilot study**», at 11th IADS Lecture Contest that will take place during the IADS Annual World Dental Congress in Indonesia 27th August-6th September 2014. We highly recommend for the student to receive the needed support, which would allow their participation at the 11th IADS Lecture Contest.
